Art Unit: 1714

The communication received 19 January 2006 has been made of record. The election without traverse of claims 6-31 is acknowledged.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 10 and claims 11-31 through their dependencies recite the limitation "said fresh low concentration polymer solution" in lines 13-14. There is insufficient antecedent basis for this limitation in the claim.

Claims 29-31 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 29 and 30 recite "cellulose acylate". The examiner is unfamiliar with this species

Claim 31 is not understood.

Appropriate clarification is required.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 6 is rejected under 35 U.S.C. 102(b) as being anticipated by Irvin.

Irvin discloses processes and apparatus for concentrating polymer solutions. These processes comprise evaporation of solvent followed by condensing the solvent and purifying it. The concentrated polymer is removed.

Art Unit: 1714

Claims 7-9 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
